

## Harry Braun's 2016 Independent Presidential Campaign is organized as a Constitutional Convention in order to ratify the Article V Democracy Amendment he has proposed

*Harry Braun explaining why ratifying the Democracy Amendment is the key to replacing the highly-toxic Oil Economy with a solar-sourced Hydrogen Economy. As Thomas Jefferson said, **"All authority belongs to the people."***

### **Empowering the Majority is now Critical**

Scientist Harry Braun's presidential vision is to replace all toxic fossil and nuclear fuels with less than three million, two megawatt wind-powered hydrogen production systems by 2020, which will include the deployment of sea-based "windships" that will provide a vast sanctuary for the remaining ocean ecosystems. And the key to this "transition of substance" is to empower the majority of registered voters with an Article V Citizen Ballot that can be downloaded from the BraunforPresident.US website, that will constitutionally replace the lobbyist (i.e., bribery)-based American Republic and its highly-toxic Oil Economy that is rapidly making the Earth uninhabitable, with a real majority rule Democracy and a solar-sourced Hydrogen Economy that has been advocated by thousands of scientists and engineers worldwide since the 1800's.

Harry Braun's Phoenix Project DVD documentary, which is also available on his campaign website, is based on his 360-page book by the same name, which is now available as an ebook on the Phoenix Project Foundation ebookstore. Braun's DVD outlines his peer-reviewed 5-year plan to replace all fossil and nuclear fuels worldwide with wind and other solar-sourced hydrogen production systems, including cannabis, photovoltaic and ocean thermal energy conversion systems that are being developed by Lockheed-Martin. In this reindustrialization effort, every vehicle, aircraft, appliance, pipeline, and power plant will be modified to use solar hydrogen fuel, just like the photosynthetic proteins and green plants have been doing for over 3 billion years.

But given the obstacle to this "transition of substance" has always been the multinational Oil Industrial Complex, whose army of lobbyists bribe senior elected officials of both political parties, Braun has organized his 2016 Independent Presidential Campaign as an Article V Constitutional Convention, in order to bypass the lobbyist-based Congress and State Legislatures, to ratify his following Article V Democracy Amendment as the 28th Amendment to the U.S. Constitution:

**"We the People, hereby empower the majority of American citizens to approve all laws, federal legislation, presidential executive orders, and judicial decisions that impact the majority of citizens."**

Most Americans believe the USA is already a Democracy, because they hear this Orwellian deception daily from elected officials and all of the corporate news networks. However, the USA is and always has been a lobbyist-based Republic, where all major decisions are made by a tiny number of elected "representatives" who are bribed in secret by armies of lobbyists who write the thousand-plus page bills that virtually no one reads.

One does not need a law degree to understand the difference between an Oligarchic Republic and a majority-rule Democracy, only a dictionary. Indeed, it is no accident that some of the most despicable governments in the world are Republics, including the governments of North Korea, Syria, Iran and Iraq. And few people in the U.S. are aware of the only country that is a real Constitutional Democracy that was formalized in the year 1291, in a remarkably diverse country with four official languages, which has not been involved in a war since the year 1847. And that country is Switzerland, where the world's first hydrogen-fueled automobile was built in 1807.

The U.S. Republic, by contrast, has proven to be catastrophically dysfunctional for the American people, and all life on the only planet in the Universe that sustains life, because it is a government of, by and for the wealthiest individuals and corporations, which includes the Oil Industrial Complex, which now owns or financially controls the major chemical, pharmaceutical agricultural, and media corporations, as well as the major Wall Street banks. These are the same reckless bankers who received trillions of taxpayer's dollars in socialistic banker bailouts for their shoddy banking practices, because President Bill Clinton decided to repeal the Glass-Steagall Act in 1999, which prevented commercial banking corporations from being involved with the high-risk casino investment banking corporations ever since the stock market crash of 1929. And Hillary Clinton still opposes reinstating Glass-Steagall after the crash of 2008.

### **The Poisoning of America**

The first ominous Poisoning of America report in Time magazine was published in 1980, and the follow-up report in 1985 was equally grim given the complete lack of controls on the mass production of toxic chemicals. And in 2010, medical professor Sunjay Gupta produced a riveting 2-hour "Toxic America" report aired on CNN in 2010, where Lisa Jackson, the director of the Environmental Protection Agency (EPA) at the time, acknowledged that over 85,000 of the most toxic chemicals known, like gasoline and diesel fuel, were all exempted from EPA review and testing when the agency was established by the Nixon administration in 1970.

This action was the result of thousands of lobbyists from the Oil Industrial Complex who wrote the thousand-page laws that allowed oil corporations to make vast fortunes by mass-producing trillions of gallons of the most-toxic chemicals known, and due to an immutable law in physics called "diffusion," these chemical poisons are now so ubiquitous on the Earth and in its atmosphere that they now arrive in the wind and rain worldwide. And the tragic result is that every man, woman and child worldwide has been contaminated, including the unborn, who now soak in a witches brew of chemical and radiological poisons from the point of conception.

This chemical contamination of the air, water and food has caused epidemics of super-sticky "amyloid" plaques in humans and other animals, which result when the critical proteins in every cell of the body are dissolved by these oil-based hydrocarbon poisons, which Wikipedia has reported are at the heart of a wide-range of tragic diseases that are bankrupting the U.S. with trillions of dollars of unfunded liabilities for health care costs, including cancer, Autism and Alzheimer's. Not even the animals in the Arctic have escaped this toxic chemical contamination in their blood because just as cream diffuses into a cup of coffee, the poisons diffuse just as rapidly when they are released anywhere in the Earth's water or atmosphere, which is a major factor in the Sixth Mass Extinction event that is now in its final exponential stages.

It is why "We the People" must Take Action Now!

### **The Trigger Mechanism is the Article V Citizen Ballot**

Fortunately, Article V of the U.S. Constitution empowers the majority of citizens who are registered voters to bypass the Congress and State Legislatures in order to pass and ratify Constitutional amendments, in what are called State Constitutional Conventions. And given the 28-word citizen-sponsored Democracy Amendment has already been written and proposed by Harry Braun, this 28th Amendment now only needs be passed and ratified by the majority of voters in 38 States when they send their ballots to their Secretary of State, which will then transfer all political power from the lobbyists, political parties and elected officials they bribe, to the majority of registered voters, which is a Universal Mind of over 60 million American citizens.

Given such a time-sensitive State of Emergency now exists for the citizens of the United States, as well as the Earth's global ecological life-support systems, it is critical that a majority of American voters be made aware of their most important Constitutional power, which is to ratify Braun's proposed 28th Amendment for Democracy with the Article V Citizen Ballot that can be downloaded as a verifiable paper ballot (unlike the votes in past U.S. computer-based elections) from the [DemocracyAmendmentUSA.net](http://DemocracyAmendmentUSA.net) website.

Once the majority of citizens in three-fourths of the States (i.e., 38 States) mail their signed paper ballots to their respective Secretary of State, where they can be verified, counted and archived, the Democracy Amendment will then become law. The United States Citizens Congress of registered voters will then be in charge, at which point the majority will have finished the American Revolution for Democracy that formally began in 1776.

The majority will then be "deciders" rather than "observers," who can then shift from the unsustainable and highly-toxic Oil Economy to a real Democracy and Solar Hydrogen Economy that is outlined on the [PhoenixProjectFoundation.US](http://PhoenixProjectFoundation.US) website. Given that none of the existing national elections in the U.S. in recent years have been valid because they are not verifiable due to the fact that the votes were counted in secret by private corporations, one wonders why all voting in the United States is not accomplished in this verifiable and convenient manor.

As Joseph Stalin once observed, "**It's not the voters who count, but who counts the votes.**" And given a technological "Utopia" of a Hydrogen Economy or an ecological "Oblivion" scenario lies in the balance, it is critical to [Take Action Now!](#) Copyright © 2015 by the Harry Braun for President Campaign Committee.
