

BraunforPresident.US

Shifting from a bribery-based Republic & highly-toxic Oil Economy that is making the Earth uninhabitable to a majority-rule Democracy ASAP, and a Solar Hydrogen Economy worldwide by 2025.

Prepared for Mr. Trent Spiner
Executive Editor, New Hampshire Union Leader

by Harry Braun
2016 Independent Presidential Candidate
CEO, Senior Scientist and author of the Democracy Amendment.

The pieces to the puzzle include the endless and tragic Oil Wars; scientist Harry Braun; the Oil Age that is almost over; wind-sourced hydrogen can power the world; a BMW hydrogen V-12 engine and liquid hydrogen storage tank; a liquid hydrogen tanker; a Lockheed OTEC plant; Windships; and a Honda solar hydrogen production and pumping system.

Princeton and Harvard University studies have documented that oil company lobbyists secured well over \$10 trillion from American taxpayers for oil tanker protection services since 1970. This is more than twice the cost of building the 2.7 million, two-megawatt wind-powered hydrogen production systems that would permanently replace all of the oil and other fossil and nuclear fuels and chemicals now used in the USA. Wind-powered hydrogen production and engine conversion systems have been in use since the 1800's, and Henry Ford demonstrated in the 1920's that the least expensive hydrogen, ethanol and plastics came from cannabis, which is also non-toxic and renewable. Every existing engine, vehicle and power plant can be modified to use hydrogen made from the sun, wind, water and biomass, which is the only known option for providing "sustainable prosperity without pollution," while powering indoor "Lifeboat" and larger "Ark" organic food production systems that will be critical for surviving the climate change chaos that the National Academy of Sciences has testified is already destroying major food production systems worldwide.

Harry Braun's Presidential Campaigns in 2004 and 2012

Braun's Press Conference for his 1984 Congressional Campaign against John McCain is shown bottom left.

It is said that when Caesar found Rome it was a city of clay, and he left it a city of marble. In that spirit, we have inherited a civilization addicted to highly-toxic fossil and nuclear fuels that are making the Earth uninhabitable, and we have the technology to leave it with sustainable and poison-free solar hydrogen energy, economic and agricultural systems. It seems nothing could possibly be more important, given the 6th Mass Extinction event that is now unfolding, and yet as I observe the daily news, I am watching the U.S. continue to launch more brutal and mindless wars for multinational oil and gas corporations. - HB

Braun for President.US

Harry Braun is shown above in his office with a Lockheed Martin solar ocean thermal "OTEC" hydrogen, seafood and fresh water-production system in the background on the left, and a "windship" hydrogen-production system on the right that was developed in the 1970's by engineering professor William Heronemus, who served as superintendent of shipbuilding for the U.S. Navy, and who believed the U.S. Navy should be in charge of building, deploying, operating and protecting the strategically important fleets of windships and OTEC hydrogen production, storage and transportation systems, which can rapidly and permanently replace all of the existing highly-toxic fossil and nuclear fuels now used in the USA and other countries worldwide with wartime-speed (i.e., before 2025), while creating a vast sanctuary for the remaining fish and ocean ecosystems that are more than 95% extinct worldwide.

Empowering the Majority is Critical

January 27, 2016

Mr. Trent Spiner
Executive Editor
New Hampshire Union Leader
Manchester, New Hampshire

Subject: Replacing the bribery-based American Republic and its highly-toxic Oil Economy that is making the Earth uninhabitable, with a real Democracy and a solar-sourced Hydrogen Economy that is non-toxic, carbon-free and completely renewable.

Dear Mr. Spiner,

As a senior scientist who represents thousands of scientists and engineers worldwide, who is also a FEC and Wikipedia registered Democratic presidential candidate, I am requesting to be included in your "independent" presidential debate on February 4th 2016, given my presidential campaign is organized as a Constitutional Convention to both pass and ratify my 28-word Democracy Amendment shown below with an Article V Citizen Ballot that can be downloaded as a verifiable paper ballot from the BraunforPresident.US website. When the majority of voters in 38-states mail their ballots to their Secretary of State, where they can be verified, counted and archived, the amendment will be ratified.

"We the People, hereby empower the majority of American citizens to approve all laws, federal legislation, presidential executive orders and judicial decisions that impact the majority of citizens."

While Bernie Sanders talks about "standing up" to the billionaires, he never explains how he is going to overcome the army of lobbyists who dominate both the federal and state governments. I sent Bernie a contribution, a copy of my book and the Democracy Amendment, but he never got back to me. In my case, my first political objective is to make the public aware of how to transfer all political power from the two political parties, the lobbyists and elected officials they bribe, to a majority of voters, which is a Universal Mind of over 60 million citizens, who will make lobbying (i.e. bribery) and money in elections illegal, while empowering the majority to approve all laws and Supreme Court decisions.

I am also the only presidential candidate who is an interdisciplinary scientist that represents thousands of distinguished scientists and engineers worldwide, who are all members of the International Association for Hydrogen Energy (iahe.org), which has been focused on replacing the Oil Economy to a zero-carbon emission Hydrogen Economy since 1974, although scientists and engineers have been advocating and developing hydrogen production systems and automotive vehicles since the 1800's.

All of the existing fossil and nuclear fuels now used in the U.S. can be replaced with 2.7 million, two megawatt wind-powered hydrogen production systems, which are no more difficult to mass-produce than the over 17 million new cars now sold in the U.S. each year. And as my Congressional Testimony documents, such systems could have been mass-produced in the 1800's. Thus the highly-toxic and unsustainable Oil Age that is in the final stages of making the Earth uninhabitable was never necessary, it was just highly-profitable for what has become the Oil Industrial Complex, which now includes the chemical, agricultural, pharmaceutical and news corporations, as well as the major Wall Street Banks.

The oil industry has always been well-aware of hydrogen, because from a chemical engineering perspective, one cannot make gasoline or other highly-toxic hydrocarbon fuels like diesel without hydrogen, which also happens to be the "Holy Grail" of all energy, matter and life in the known Universe. But if pure hydrogen fuel is used that was first made from water with electricity in the year 1800 in the UK, there is no need for gasoline or oil companies because electrolytic hydrogen production has been in the public domain for over 200 years, thus all of the trillions of dollars for fuel would flow to the U.S. Treasury.

Moreover, as Henry Ford demonstrated in the 1920's, the least expensive hydrogen, ethanol and plastics were made from cannabis crops, which are four times more efficient than corn, without requiring any of the toxic oil-based pesticides or fertilizers, which is why it was half the cost of gasoline. This was the real reason why oil company lobbyists used an unknown Mexican slang term "marihuana" (spelled with an "h") in their media campaign to remove cannabis from the market as a dangerous drug, with no recorded vote in either the House or Senate in 1937, and over the objections of the American Medical Association.

Indeed, few people are aware that the AMA has documented the THC in cannabis is not a toxic "drug" at all, (unlike the toxic prescription drugs that are made from oil, which according to the CDC are killing thousands of Americans annually), but a 500 million-year-old "neurotransmitter" that switches on a remarkable two-way communication system throughout the brains of all vertebrate animals. This has completely redefined the science of neurology, and underscores the need to end the mindless cannabis laws and wars immediately, which blatantly violate Article 1, Section 8 of the U.S. Constitution.

The other existing presidential candidates are clueless about the most serious energy, economic and environmental and related health care problems -- *much less the solutions*. Thus as the Sixth Mass-Extinction event in the Earth's 4.5 -billion-year-old history unfolds, voters are forced to listen to endless amounts of empty political rhetoric about how "exceptional" Americans are with slogans that say as little as possible, while raising as much money as possible. And any money left over is kept by the candidates whether they win or not, which is why involving money (i.e., bribery) in politics should be illegal.

Thus in the Orwellian American Republic, which is inaccurately called a democracy, public service is really all about amassing personal wealth from lobbyists. And as Hillary Clinton has demonstrated, gender is irreverent when it comes to secretly negotiating bribes from the highly-toxic oil and uranium multinational corporations worldwide. From day one as Secretary of State, Hillary's major focus and "accomplishments" involved promoting the Global Oil Shale "fracking" Initiative for multinational oil corporations worldwide, which subsequently poisoned untold numbers of aquifers and innocent people, while triggering a new Cold War with Russia and destabilizing governments in the Middle East and Ukraine, as the U.S. military was ordered to spend billions of dollars bombing unknown numbers of people with uranium-tipped bombs and munitions that have a half-life of 4.5 billion years.

According to *The Washington Post* published on February 18, 2015: "Since its creation in 2001, the Bill, Hillary and Chelsea Clinton Foundation has raised close to \$2 billion from a vast global network that includes corporate titans, political donors, foreign governments and other wealthy interests. This includes \$262 million that was raised in 2013 — the year Hillary Clinton stepped down as secretary of state.

A *New York Times* report (April 23, 2015) "*Cash Flowed to Clinton Foundation Amid Russian Uranium Deal,*" also detailed how Putin's Russian uranium investors gave millions to the Clinton Foundation for a deal orchestrated by Bill Clinton and approved by Secretary of State Clinton that transformed Russia into a uranium superpower by acquiring one-fifth of all of the highly-toxic uranium resources in the U.S., which are only safe if they are not mined. And over \$250 million was secretly deposited into a foreign Clinton Foundation account, which was not disclosed to the IRS or the Obama administration, which is a felony. Yet these major "accomplishments" of Hillary as secretary of state have failed to be mentioned to the voters by her in the debates -- or the oil industry-controlled corporate news media.

Hillary is now under investigation for her secret email accounts which were understandable, given the illegal activities she was involved in that circumvented the U.S. State Department she was supposedly working for, as well as the Freedom of Information Act, the U.S. National Archives & Records Administration, and thus the American people. Moreover, when Hillary Rodham was a 27-year old staff attorney working for the U.S. House Judiciary Committee during the Watergate investigation, she was fired by her supervisor, lifelong Democrat Jerry Zeifman, who in a published interview that is online referred to Hillary as **"a liar who was unethical, dishonest, and conspired to violate the Constitution, the rules of the House, the rules of the Committee, and the rules of confidentiality."**

However, these multiple felony-class issues have been ignored in the campaign, by the Obama Justice department, and the oil industry-owned news media, who all have an enormous investment in Hillary and Bill Clinton, which dwarfs that of any of the Republican candidates. This bribery-based American Republic is the reason why the only planet in the Universe with life is being made uninhabitable. The scientific community is alarmed but can do nothing but watch as humanity accelerates into a mass extinction event, which is now in it's final exponential stages, which means it is almost over.

Watching the current American presidential race is a shocking event to people worldwide, given the bizarre nature of both Donald Trump, who openly advocates "Making America Great Again" by using U.S. military forces to "take" (i.e., steal) Iraq's oil, and Hillary Clinton, whose chief accomplishment as Secretary of State was raising nearly \$2 billion for the Clinton Foundation, much of which was not reported to the IRS, while overthrowing governments in Ukraine and Libya, which involved mass-murdering and contaminating vast numbers of innocent people worldwide for multinational oil corporations, including Halliburton and Exxon, which no one asked Hillary about in the so-called debates.

Medical physics professor John Gofman said only one word came to mind regarding such indiscriminate chemical and radiological contamination of billions of innocent people for profit, and that word was "Nuremberg." But no such justice can take place until the Democracy Amendment is ratified, which needs to take place long before the next unverifiable election in 2016, where the computer votes will once again be counted in secret by private corporations that few people are aware of. As Joseph Stalin once observed, **"It's not the voters who count, but who counts the votes,"** which is why the completely verifiable Article V Citizen paper Ballot is so important in a real Democracy, until such time as everyone's computer can be turned into an encrypted voting machine.

If it is the quality of ideas that count, I hope you agree that the voters of New Hampshire and the USA need to hear my voice in the next Democratic Presidential Debate on February 4, 2016.

Sincerely,

Harry W. Braun III
Democratic Presidential Candidate

BraunForPresident.US

Empowering the majority of voters to replace all oil and other highly-toxic fossil and nuclear fuels and chemicals with hydrogen made from the sun, wind and water.

Sustainable Prosperity without Chemical Poisons

Hydrogen is the Holy Grail for all energy, matter and life in the known Universe, and it was first made from water with electricity generated from wind systems in the 1800's. And because such hydrogen systems are no more difficult to build than automobiles, they can easily, rapidly and permanently replace all of the highly-toxic and non-renewable fossil and nuclear fuels now used in the USA and worldwide, thereby providing a Hydrogen Age of "sustainable prosperity without pollution" by 2020. The key is to ratify Braun's proposed Democracy Amendment with the Article V Citizen Ballot, which can be downloaded as a verifiable paper ballot from the BraunforPresident.US website.
